**SUSTAINABILITY
TRANSITION
CONSULTING
(LLC)**

Who We Are

We are an organization founded by the members of the Global Network for Sustainable Development (GNSD), a project of Julie Ann Wrigley Institute of Sustainability at Arizona State University in USA.

With the help of Partner Organizations we created an international Team of Experts in such areas as coaching, management, finance, community building, education, health services, water and waste management, environmental engineering, information technology, etc.

Currently, in collaboration with our partners, we are conducting the projects **Smart Schools for Sustainable Smart City** and **Peace Clubs for Sustainability**.

What We Do

We offer consulting services to governments, corporations, and community organizations that want to embed sustainability into their cities, communities, organizations and the operations & lifestyles of citizens.

Knowing that 70% of change initiatives fail because of the inability to survive transition period, SusTranCon places special importance on the transitioning period to the new sustainable future.

How We Do It

Organizations and individuals involved in the development of a smart city can receive consulting support at each of the following stages of the process:

- 1) Assessing the status quo
- 2) Identifying needs
- 3) Setting S.M.A.R.T. goals
- 4) Creating strategy for action
- 5) Training all stakeholders
- 6) Implementing the project
- 7) Evaluating the outcomes
